

# Which sector have the highest average operating income?

The column chart depicts the average operating income of the sectors over all the years in the dataset.

With average operating income of \$9818945250 Telecom Services is top among all followed by Financials and consumer staples with \$4421005231 & \$4255035969 operating income respectively.

# Which sector have the highest average operating Income?

By observing box & whisker plot it's clear that telecom services are really a big outlier in the dataset. Healthcare being the median earner in terms of Operating income.

Since the data is skewed so median would be a better judge of average than the mean. 75% of the sectors have operating earnings upto \$4255035969 which is the 3rd quartile. Real Estate sector is the lowest in terms of operating income.
